Campers will have an exciting week of training as a circus performer. We transform the entire gym into a circus training facility. We teach aerial silks, aerial hoop, and trapeze to increase strength and flexibility in a fun and challenging way. Campers will learn acrobatics and gymnastics on our tumble track and bungee jump. Our juggling equipment helps improve focus and concentration. Campers walk on stilts and ride unicycles increasing balance and coordination, and learn some cool new hula hoop tricks while getting circus fit. Back again this year.... SWINGING TRAPEZE!!!

June 10-14
9am-12pm
Ages 5-8

Coding Foundations: Come check out the latest in pre-reader coding! In this class, students will use hands-on tools, apps, games, and coding robots to learn the fundamentals of coding. Students will work through multiple levels of our Coding Foundations curriculum in preparation for Scratch. Students will be grouped by age and ability level. For students entering Kindergarten and 1st grades, we typically recommend only taking the foundations class for one or two half-day classes per summer. If they do take 2 classes, they shouldn't be in the same week. 2nd graders who complete Coding Foundations can move on to the Intro to Scratch class this summer.

June 24-28
9am-4pm
Ages 8-12

Make Games in Scratch Are you worried your child spends too much time gaming? Channel their passion into creating their own online games! In this class, students will use the drag and drop programming tools in Scratch 3.0 to work on projects based around gaming. Students will start with simple mazes and—depending on skill-level—advance to building games like Flappy Bird or Mario Bros. By the end of the week, students will have completed multiple games for their Scratch Portfolio.

July 8-12
9am-12pm
Ages 11-14

Introduction to Python Is your child ready to take the next step in coding? Python is a great program for transitioning from Scratch to text-based programs. In this class, students will receive guided instruction as they work on text-based games and projects based on Al Sweigart's book "Invent Your Own Computer Games with Python." By the end of the week, students will be able to create their own text-based games.

July 8-12
1pm-4pm
Ages 11-14

Intro to Graphics in Python This class is also an introduction to Python, but we wanted to mix things up a bit so that we can work on different types of projects throughout the day. In this class, students will use Python to create graphics for a memory matching game as well as games like Worm and Tetris. Students will receive guided instruction as they work on projects based on Al Sweigart's book, "Making Games with Python and Pygame" and deepen their understanding of the Python platform. No Python experience is required
